Condition Codes

Part Condition Codes

NE – Factory New Parts with Full Traceability are obtained directly from an original equipment manufacturer, authorized distributor, or other known source. These items will be accompanied by an FAA 8130-3 or manufacturer’s certificate of conformance.

OH – “Overhauled” and **SV – “Serviceable”** components, or “rotables” are supplied with FAA 8130-3 certification and vendor strip reports. Items are certified by FAA approved repair stations as overhauled, repaired, functionally tested, or inspected as applicable. *Also see [Warranty Policy](#).*

NOTE: instruments and solid-state electronics are tagged **SV** because they have no rotating parts and cannot technically be “overhauled.”

NS – New Parts, Other Sources – New material from other known sources such as service centers, operators, and distributors. We only buy new surplus (NS) material from known, non-military sources.

To ensure compliance with customer quality programs, every NS item sold comes with an accurate traceability statement. We offer a money back guarantee for all unused, unopened material returned within ten days of the original purchase (see [Return Goods Policy](#)).

Condition of Sale Codes

OR – Outright Sale (See [Return Goods Policy](#))

EX – Exchange Sale (See [Exchange Terms & Conditions](#))
